

GENUINE MEGA

MEGA WATER PUMPS

No pump, no spray. It's that simple. Mega water pumps are not off-the-shelf irrigation pumps designed to run sprinklers; they are the product of over 35 years of experience and constant improvement. We know what works best, and we are continuing to develop our water pumps for the varied demands of heavy equipment use.

M-3 Direct Motor Mount, CCW
304985

The Mega M-3 water pump is a cost effective open centrifugal water pump suitable for water tanker applications where up to 3 spray heads will be operated simultaneously. The low horse-power draw of this pump is well-suited for on-highway type tankers as well as for small articulated tractor type water tankers where available space is limited.

Pump construction of high quality gray cast iron gives good durability and long life. The heavy duty Stress-proof 1.875 inch diameter shaft and heavy twin bearings allow the M-3 Pump to operate on higher drive RPM units (optimal range of 2,350 ± 50 RPM, maximum capability of 3,000 RPM).

- Equipped with a rope-packing seal.
- Capable of over 800 gpm available flow, and over 80 psi available pressure.
- Mega M-3 series water pumps feature a 4 inch NPT threaded inlet and a 3 inch NPT threaded outlet.
- Available in both clockwise and counterclockwise configuration.

The standard pump drive is configured for direct mount of a 'C' fit face hydraulic motor with splined shaft or with 'B' fit face direct motor mount. The pump can also be configured for plain-keyed shaft external coupling to a variety of drive motors.
