THERE'S WORK TO BE DONE

For over 45 years, Mega has been providing specialty haulage equipment for use in construction and mining operations. Our water haulage equipment, service bodies, bottom-dump trailers, equipment transports and other products are designed and manufactured to be reliable and durable machines. The knowledge and experience that comes from delivering over 6,000 machines is built into every product we make.

Our employees take pride in their workmanship and Mega has developed a reputation for manufacturing quality products that are built to last. Our sales and product support staff are known for providing solutions and demonstrating integrity throughout the ownership experience. Our product's value is reflected in our industry-leading brand recognition and resale value – Genuine Mega products have become the standard by which others are measured.

Mega products, parts and service can be found at OEM construction and mining equipment dealers around the world. Our sales and product support departments at Mega are available to help answer your questions. For more information, please contact us @ +1 505.345.2661 or toll free in the USA at 1.800.345.8889 or on the web at www.megacorpinc.com.

There's work to be done – and, from all of us at Mega, we want to help you do it!

GENUINE MEGA VALUE

> VALUE

- The Mega mobile pump is essential to the operation of production tools
- Mega mobile pumps provide the highest levels of dependability and longevity
- The high quality provides a lower cost of ownership and more profit from production tools
- The superior longevity of Mega mobile pumps provides high resale value lowering the cost of ownership

> PRODUCT SUPPORT

- Our dealer relationships and a fully integrated machine provide seamless support and the highest level of machine availability
- Mega is the most recognized and valuable brand of tank on the market
- Over 40 years of knowledge and experience with prime mover integration
- Every Mega water tank includes a full set of Operation and Service Manuals
- www.megacorpinc.com provides useful information and complete contacts for support
- Phone, online and on-site support for dealers and end users with 24 hr/day parts and advice to ensure seamless machine support
- Unsurpassed product warranties and dealer support

MMP-MEGA MOBILE PUMP

TAKE IT WHERE YOU NEED IT

The MMP is the best solution to rapidly fill water distribution equipment from ponds, ditches, or other sources of water in remote areas where there is limited availability. The rugged and trouble-free MMP is highway-ready for easy transportation to the worksite and can be set up by one person. A diesel engine-driven hydraulic motor supplies power to the axial flow water pump, intake and discharge piping lift cylinders and all controls with a diesel engine. With a nominal flow of 3,500 gpm, the MMP can fill tanks in minutes. Currently, the MMP design incorporates a reliable Caterpillar® C2.2 diesel engine.

Our MMP includes a complete set of technical manuals detailing operation, maintenance, inspection and replacement parts. Mega mobile pumps are constructed with premium materials and are inspected throughout the manufacturing process to produce the best mobile pump available.

Available Mega Mobile Pumps

MEGA MODEL	ENGINE TYPE
MMP	Caterpillar Diesel

For other engine types please contact Mega or your local dealer for more information.

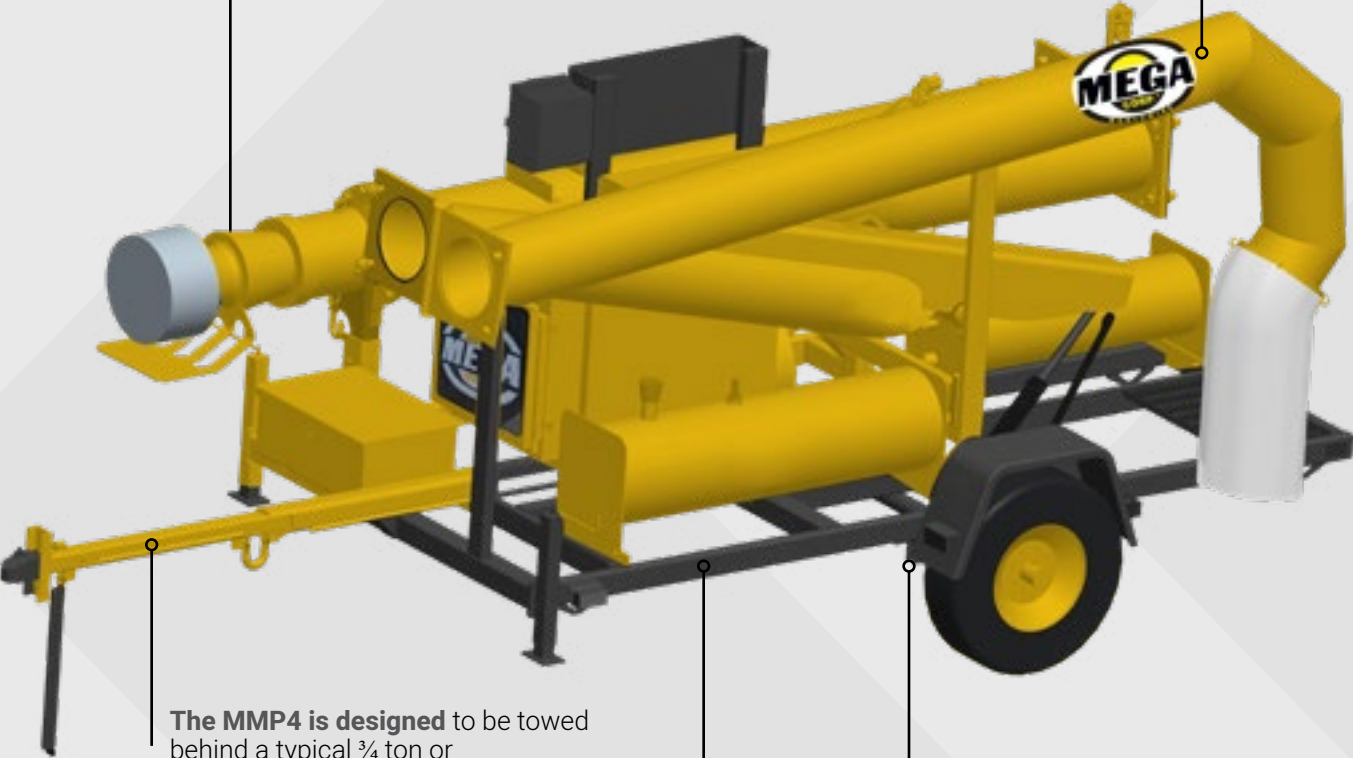

Highway capable chassis. One person operation for travel, set up and use.

Mega Mobile Pump Features

Hydraulically driven axial flow water pump includes a heavy debris inlet screen to prevent any debris from entering the pump.

The MMP4 is capable of lifting water approximately 25 feet (7.6 meters) with a discharge port of 17 feet (5.2 meters) above ground level.

The MMP4 is designed to be towed behind a typical ¾ ton or 1 ton capacity pickup truck.

Equipped with a 6,000 lb (2,725 kg) rated single axle utilizing a double eye leaf spring suspension.

The frame is constructed from steel tubing welded together to form a rigid mounting platform for the components of the MMP4.

STANDARD FEATURES

MMP tanks include the following standard features. For additional information, contact our Mega Sales Team.

Caterpillar Diesel Engine C2.2 Tier IV
D.O.T.* Lighting and Reflectors
Diesel Fuel Tank Capacity
Discharge Sock
Discharge Tube Stream Straightener
Eco-Friendly AW46 Hydraulic Oil
Engine Throttle, Controls and Instrumentation Cabinet
Folding Tongue Provides Optimal Access for Filling Water Equipment
Full Fenders
Hitch Assembly Rated for 4,536 kg / 10,000 lb with 59 mm / 2-5/16 inch Ball
Hydraulic Manifold with Test Ports
Hydraulic Oil Filter
Hydraulic Reservoir with Fluid Level Gauge
Hydraulically-Driven Axial Flow Water Pump
Independently Adjustable Intake and Discharge Tubes
Leveling Jacks
Lifting Eyes
Lockable Tool Storage Area in Battery Box
Maintenance Free 12V Battery
Radial Range E Load Tires
Single Person Transport and Setup
Trailer Axle Lockable Rated to 2,722 kg / 6,000 lb
