MEGA MOBILE PUMPS POWERING PRODUCTIVITY

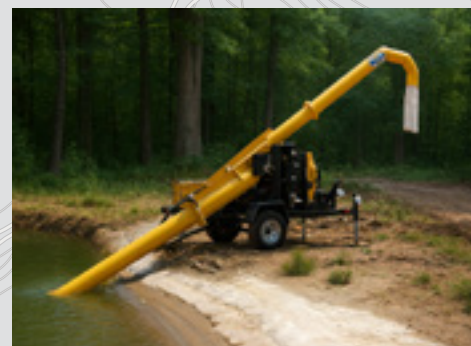

BUILT FOR FAST WATER TRANSFER, WHEREVER THE JOB TAKES YOU

Mega Mobile Pumps (MMP) deliver fast, reliable water transfer for remote locations with limited access. Built for durability and ease of use, this highway-ready unit can be transported and set-up by a single operator.

Powered by a Kubota 49.6 bhp Tier 4 diesel engine (CAT® engine available), the MMP uses a hydraulic pump to operate its axial-flow water pump, lift cylinders for intake and discharge piping, and all system controls. With a nominal flow rate of up to 3,500 gallons per minute, it can fill tanks in just minutes making it fast, efficient, and field-proven.

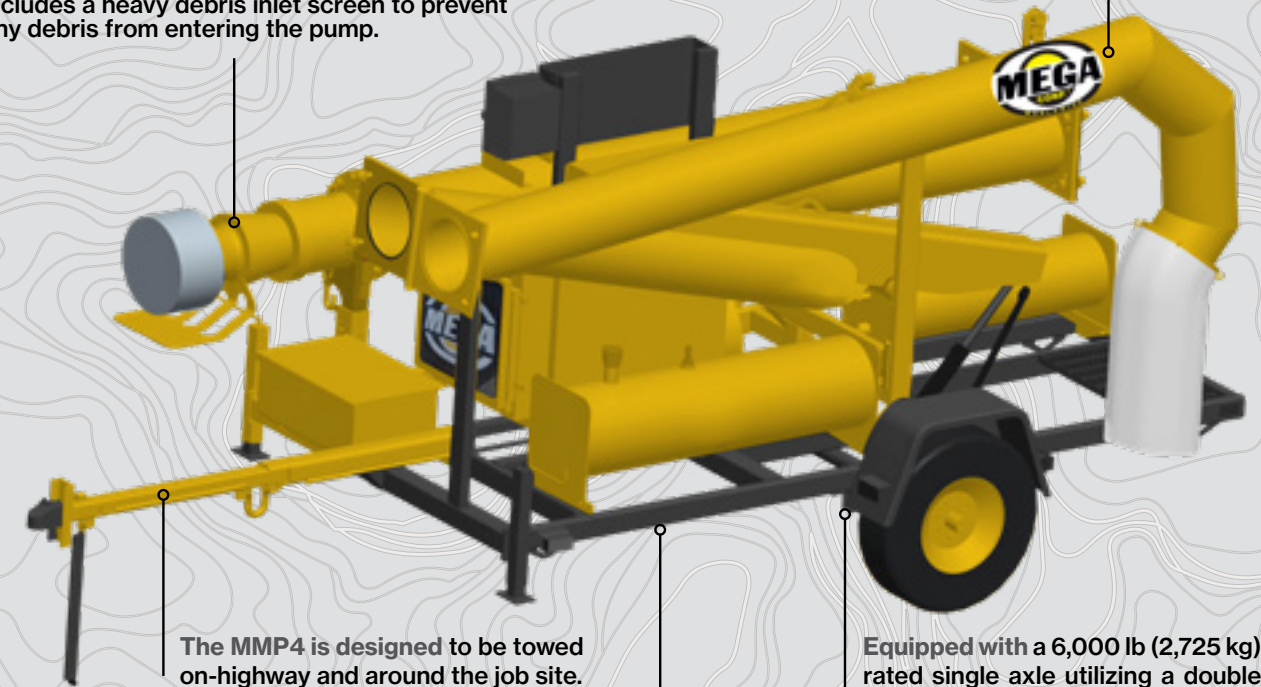

Whether you're ready to purchase or simply have questions, your Mega Sales Team is here to help you move water quickly and without delays. Mega products, parts, and service are available through OEM dealers worldwide. Contact us at +1.505.345.2661, or toll-free in the USA @ 1.800.345.8889. Visit our website @ www.megacorpinc.com to learn more.

USE IT...WHERE YOU NEED IT

Hydraulically driven axial flow water pump includes a heavy debris inlet screen to prevent any debris from entering the pump.

The MMP4 is capable of lifting approximately 25 feet (7.6 meters) with a discharge port of up to 17 feet (5.2 meters) above ground level.

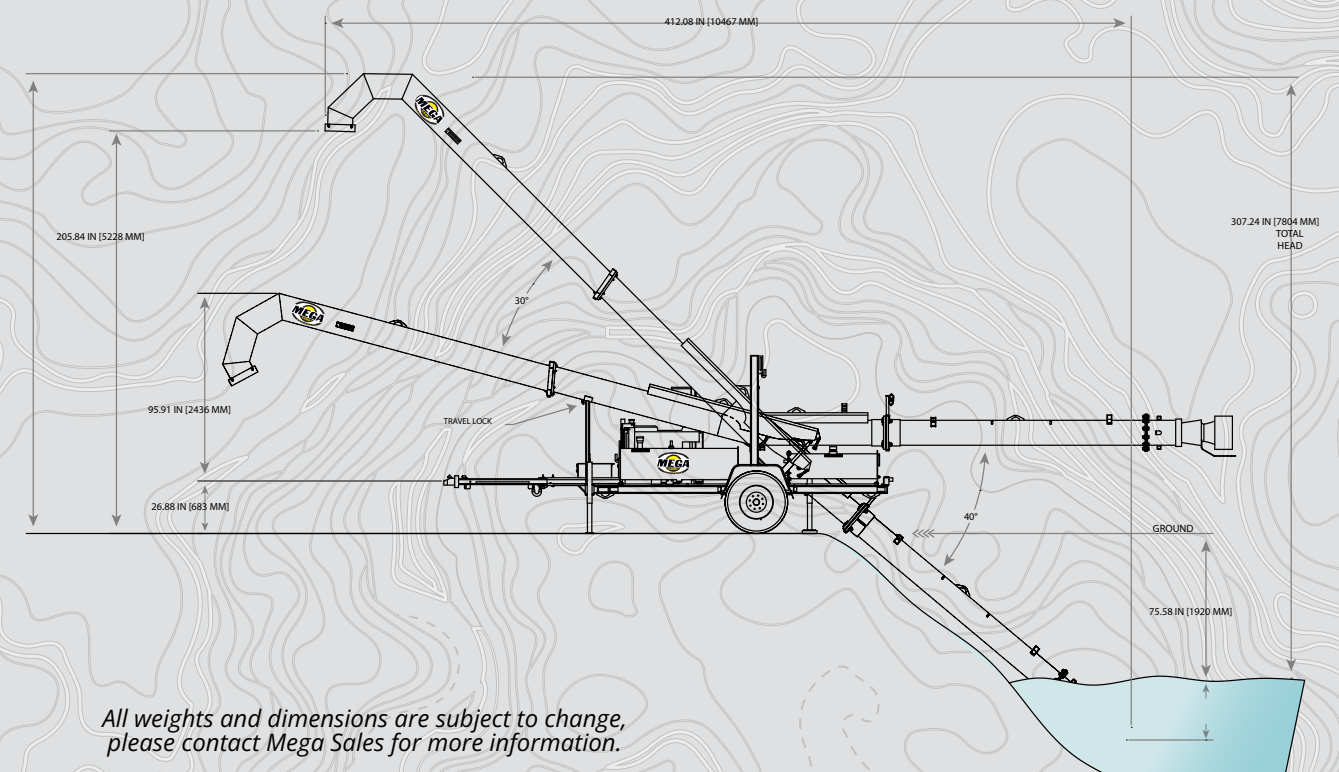

The MMP4 is designed to be towed on-highway and around the job site.

Equipped with a 6,000 lb (2,725 kg) rated single axle utilizing a double eye leaf spring suspension.

The frame is constructed from steel tubing welded together to form a rigid mounting platform for the components of the MMP.

MEGA MOBILE PUMP EXTENDED

All weights and dimensions are subject to change, please contact Mega Sales for more information.

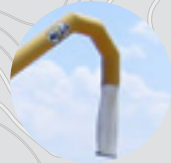

EXTERIOR PAINT

Corrosion-resistant primer is applied to abrasive-blasted steel, followed by a durable urethane enamel top-coat for long-lasting protection.

HYDRAULIC TANK & ECO-FRIENDLY OIL

The hydraulic system features a reservoir with a filter, level gauge, and eco-friendly AW46 hydraulic oil. It also includes a hydraulic pressure gauge and test ports for easy monitoring and maintenance.

DISCHARGE SOCK

A discharge flow straightener and sock help control water flow for safe, targeted discharge and reduces erosion in sensitive areas.

BATTERY & BATTERY DISCONNECT

Featuring a reliable 12-volt maintenance-free battery and a convenient disconnect switch for effortless power management and enhanced safety when the equipment is not in use.

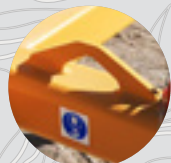

ADJUSTABLE JACKS

Adjustable leveling jacks provide easy height adjustment and stable setup on uneven surfaces.

TIRES, FENDER & AXLES

Equipped with R16 tires designed to handle heavy loads and a single trailer axle featuring full fenders for added durability and protection. The axle is rated for 2,722 kg (6,000 lb), providing secure and reliable towing capacity during transport.

LIFTING EYES

Lifting eyes positioned on the frame allow for safe and efficient hoisting and placement using cranes or other lifting equipment.

LOCKABLE TOOL BATTERY BOX

A lockable tool storage area is integrated into the battery box, keeping essential tools secure, organized, and easily accessible when needed.

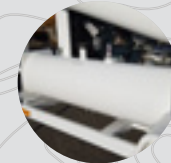

D.O.T. LIGHTING & REFLECTORS

The mobile water pump comes equipped with D.O.T. compliant lighting and reflectors, ensuring safe and legal transport on public roads while enhancing visibility.

MMP-MEGA MOBILE PUMP

FEATURES DESIGNED TO KEEP WATER MOVING

FUEL TANK

Equipped with a 50-gallon diesel fuel tank, this unit delivers the capacity and reliability needed for extended operation on the job site.

DIESEL ENGINE

Powered by a Kubota 49.6 bhp Tier 4 diesel engine (CAT® engine available), the system delivers reliable performance while meeting emissions standards.

EASY TRANSPORT & SETUP

Designed for easy transport and setup, the MMP4 can be quickly deployed.

HYDRAULIC WATER PUMP

A hydraulically driven axial flow water pump delivers consistent performance and reliable water flow for demanding job site applications.

TRASH SCREEN

A heavy-duty debris screen at the pump inlet helps prevent large particles and debris from entering the water pump.

INTAKE & DISCHARGE TUBES

Independently adjustable intake and discharge tubes allow flexible setup and smooth water flow control, with a capacity of 3,500 gpm (13,200 lpm) for high-volume performance.

SYSTEMS CONTROL

A centralized control cabinet houses the engine throttle, system controls, and instrumentation, offering easy access for simple operator and monitoring in any working environment.

HITCH ASSEMBLY

The hitch assembly is rated for 4,536 kg (10,000 lb) and includes a 59 mm (2 3/16 inch) ball. A folding tongue provides easy, unobstructed access when filling water equipment.
